Media Display Services

digi sign

What does the industry need for digital media today?

Organizational Challenges Faced Today

Lack of dedicated handling

Between Marcomm, Product/Brand, Content, and IT, who should take charge?

IT team is too busy and unable to address digital media tasks

STARTUP & SME company

To have comprehensive digital signage capabilities, yet they want to utilize standard home TVs.

Software solutions from China or Korea lack a clear roadmap, features, and local support.

Discover how our digital signage solutions can empower your business to achieve its goals.

Then, what is the suitable CMS (Content Management System) software?

Some software vendors are incomplete!

Software vendors and brands have no local support!

Several LCD brands have different software each!

Software from China, lacks roadmap / features, and local support

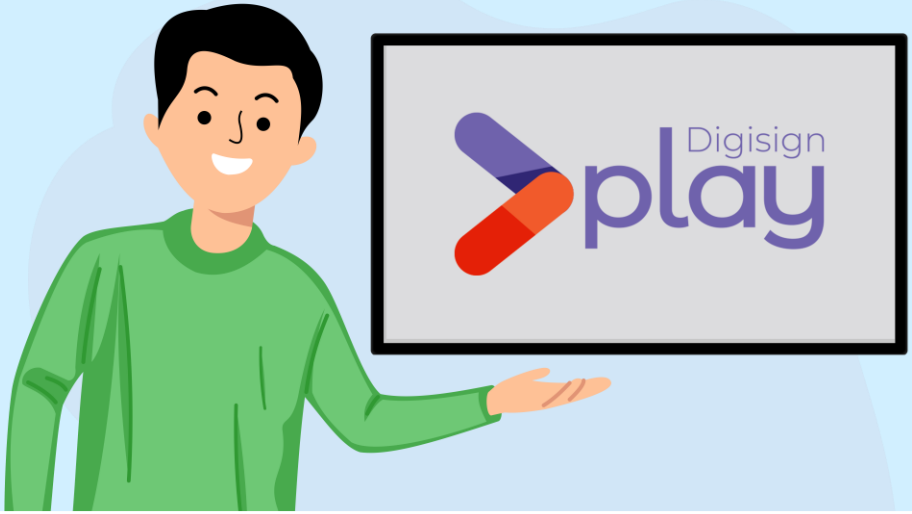
We Need this for our Digital Media in our company

- Software that can manage hundreds of thousands of layers, various brands, and even videotrons.
- Look for a vendor that provides a complete solution, from sales to installation and managed services.
- The company requires options for purchase, rent, and even inquiring about managed services.
- A Digital Signage partner that can meet diverse, evolving, and dynamic business needs.

InnoGRAPH offers various solution services as follows:

Various Business Models:
in the form of sales services, rental of Digital Media Display, support, consultation, systems integration, specific/customer requirements, and even up to full managed services.

Media Display Services (MDS): monthly paid digital media display rental services, supported by Digisign Play CMS and various other services for periods of 12/24/36 months.



Digisign Play: CMS software for all types of Digital Media (LCD) from various brands, operating systems, including LED Videotrons, with complete capabilities supporting small, medium, and large customer-based LCD.

Various types of services and support

One contracts for all

installation services

content updates*

comprehensive managed services or outsourced operations in the field of digital media.

Display Options:
We provide LCD and LED (Videotron) digital display options for various usage needs, with demos/samples available for prototyping, and part of our stock ready for installation.

And also,
explore other digital media solutions (Kiosks, Interactive Flat Panels, Podiums, etc.) from InnoGRAPH.

What is Digisign play ?

Digisign play is a new cloud-based CMS solution used to easily manage content on your digital signage network through a web browser. Digisign play is a solution for various industries, such as F&B, hospitality, education, corporate, manufacturing, and more

digisignplay.com
